

# CME Product Catalog

## VIEWING OPTIONS:

To make our catalog easier to read we recommend using a two page display, as some sections have one page for the exploded view and one for the parts listing. Changing these settings will allow you to see the exploded view and parts listing on the screen at the same time. This can be easily done with the following steps.

### Adobe PDF Viewer

In Adobe PDF Viewer, from the main toolbar choose 'View', then 'Page Display', turn on 'Two-Up' and 'Show Cover Page During Two-Up'

### FoxIt PDF Viewer

In FoxIt PDF Viewer, from the main toolbar choose 'View', then 'Page Display', turn on 'Facing' and 'Show Cover Page During Facing'

## About CME

Central Mine Equipment Company was founded in St Louis, Missouri in 1928. Our initial product line included augers, cutters and related accessories for the coal mining industry. In 1962, we introduced our first drill rig, the CME-55.

Today, we design and manufacture a complete line of drilling equipment for the geotechnical, environmental, mineral exploration, and construction industries. We also build a complete line of hollow-stem and continuous flight augers, auger accessories, sampling systems, and all-terrain and rough-terrain carriers.

In addition to our line of quality-manufactured products, CME is a leading provider of tools, equipment, and supplies for core and rotary drilling, soil sampling, and ground water monitoring.

The key to our success has been product innovation and service after the sale. Central Mine Equipment Company holds patents covering everything from auger connections and sampling systems to drill rig safety features, including an emergency spindle brake that can stop rotation in less than a revolution. This system is standard on all CME drill rigs.

In order to best serve the needs of our customers, all manufacturing, warehouse, and office operations are consolidated at our 210,000 square foot, state-of-the art facility located in St. Louis, Missouri.
